## Regulations

**1910.147(c)(5) OSHA Lockout Device Requirements state that lockout devices must:**

- Be provided by the employer and be standardized by size, shape or color
- Be distinguishable from locks used for other purposes. Lockout locks should only be used for lockout
- Identify the individual who applied the lock (both tags and lock labels are acceptable for this purpose)
- Be capable of withstanding the usage environment and be strong enough to prevent removal except by using excessive force with special tools, such as bolt cutters
- Most importantly, whenever lockout devices are applied, they must remain under the exclusive control of the individual who attached them. No employee should be able to open a lock attached by someone else

## Brady SafeKey Lockout Padlocks

With this innovatively designed padlock, you get up to 700% more unique key possibilities than a standard safety padlock, without sacrificing a secure lockout. It's all in the forward-thinking design of the locking mechanism and unique key blade that gives you more precision and control in your lockout program. With that level of precision, you're covered from your simple to highly complex lockout needs. You also get:

- Fast identification with the color-matched key
- Easy operation with extra smooth key insertion and removal — even when wearing gloves!
- Years of use with the low-friction locking mechanism that helps maintain key integrity
- Excellent durability in industrial environments

Padlocks

## More really means more with SafeKey

In your lockout scenario, here's what you get with up to 700% more unique key codes:

	Other Nylon Padlocks	SafeKey Lockout Padlocks	
Keyed Different	15,000 Key Codes	100,000+ Key Codes	
1 Master Key	3,250 Key Codes	15,000+ Key Codes	
25 Master Keys	150 Key Codes	600+ Key Codes	

Padlocks

## Keying options for SafeKey and traditional lockout padlocks

### Standard options

#### Keyed Different (KD)

Each lock is opened by its own unique key. Perfect for simple lockout applications and a manageable number of energy isolation points.

#### Keyed Alike (KA)

Each lock in the group can be opened with the same key, reducing the number of keys needed. Ideal for employees who work on multiple machines or isolation points.

### Custom options

#### Master Keyed (MK)

Each grouping of locks (whether keyed alike or different) can be opened with a master key. Useful for larger, complex systems when supervisory access may be required.

#### Grand Master Keyed (GMK)

The grand master key can open all locks grouped into two or more master keyed systems. Useful when supervisory or managerial access to all locks is needed.

### Key Charting

Brady will keep a record of and "chart" all key numbers to ensure there's no unwanted key duplication on current or future orders, depending on your unique requirements.
