

AERIAL SUPPORT TIE INSTALLATION INSTRUCTIONS

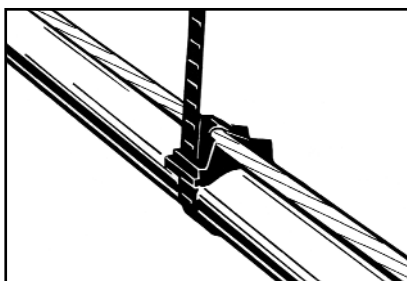

- 1) Snap groove portion of tie onto support strand.

- 2) Position cable against tie spacer and thread tail through slot in head. Push upwards on body of tie until snug.

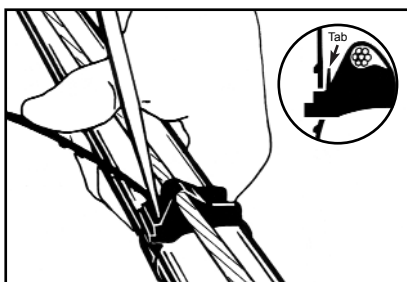

- 3) Use pliers utilizing tension steps on tie to tighten completely.

- 4) Support tie shown when properly installed. If releasability is not required, tip can be cut off.

TO RELEASE . . .

Use screwdriver to push locking tab towards support strand.
