

SINAMICS G120 standard inverters

0.37 kW to 250 kW (0.5 hp to 400 hp)

Supplementary system components
Memory cards

Overview

SINAMICS micro memory cards (MMC), SINAMICS SD card

The parameter settings for an inverter can be stored on the SINAMICS micro memory card (MMC) or the SINAMICS SD card. When service is required, e.g. after the inverter has been replaced and the data have been downloaded from the memory card, the drive system is immediately ready for use again.

- Parameter settings can be written from the memory card to the inverter or saved from the inverter to the memory card.
- Up to 100 parameter sets can be stored.
- The memory card supports standard commissioning without the use of an operator panel such as the BOP-2 or the STARTER commissioning tool.

Note:

The memory card is not required for operation and does not have to remain inserted.

Selection and ordering data

Description	Order No.
SINAMICS micro memory card (MMC) 64 MB	6SL3254-0AM00-0AA0
SINAMICS SD card 512 MB	new ¹⁾ 6SL3054-4AG00-2AA0
