

Design**Licenses for the WebNavigator**

The WebNavigator Client software can be installed as many times as required without the need for a license.

- **Server-based licensing**
 - A license is required for using the WebNavigator Server.
 - Licenses are available for simultaneous access to the web server by 1, 3, 10, 30 or 100 clients.
- **Diagnostics Client Licensing**
 - For cost-optimized access by one or a small number of WebNavigator Clients to numerous web servers (e.g. for diagnostic purposes).
 - This client license provides guaranteed access to web servers at any time.
 - In respect of function there is no difference compared with regular WebNavigator Clients and the two can be mixed.

WebNavigator Clients are capable of accessing several different web servers.

Thin Client solutions

The WebNavigator can also run under Windows Server 2008 R2 SP1 or Windows Server 2012 R2 terminal services. The Windows Server 2008 R2 SP1 or Windows Server 2012 R2 operating system is required. This makes it possible, for example, to connect SIMATIC Thin Clients to the WinCC server as visualization stations.

For this purpose, the Windows terminal services must be installed on the PC on which the web client is installed. The Windows Server 2008 R2 SP1 or Windows Server 2012 R2 operating system is required.

Up to 25 Thin Clients can be connected to one terminal server.

Applications:

- Mobile devices
- Handhelds
- Rugged on-site visualizations

Function

The WinCC basic system makes setting up and configuring a WebNavigator Server very easy. WinCC process screens to be visualized via the Internet are created as usual using the graphic editor.

To display WinCC process screens on the web client, the Microsoft Internet Explorer or browser is used independent of the supplied WinCC Web Viewer (WinCC Viewer RT).

The operator on the web client is integrated in the central WinCC user administration and can operate and monitor the system according to the configured access rights.

The WebNavigator supports all standard security mechanisms that can be used for applications on the Internet, e.g. routers, firewalls and proxy servers.

Ordering data**Article No.****SIMATIC WinCC WebNavigator as from Runtime Professional V14 and WinCC as from V7.4²⁾**

Single license, license key on USB flash drive
